## Professional Summary

Machine Learning Engineer with 1.5+ years of experience in machine learning, data analysis, predictive modeling, and data visualization. Proficient in Python, Pandas, NumPy, Scikit-learn, and SQL, with a track record of building scalable machine learning pipelines, automating data workflows, and delivering business-focused analytical solutions for client-driven requirements.

## Technical Skills

**Programming Languages:** Python, SQL, JavaScript, HTML, CSS

**Machine Learning:** Scikit-learn, Supervised Learning, Unsupervised Learning, Classification, Regression, Clustering, Model Evaluation, Feature Engineering, Predictive Analytics

**Data Analysis:** NumPy, Pandas, Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing

**Databases:** MySQL, SQLite

**Tools & Platforms:** Git, GitHub, Jupyter Notebook, VS Code, Matplotlib, Seaborn

## Professional Experience

### Machine Learning Engineer

Jan 2025 – Present

TMIS, Chennai

- Designed and deployed machine learning models to meet client-driven business requirements, supporting [X] production use cases.
- Built end-to-end data preprocessing and feature engineering pipelines using Python, Pandas, and NumPy, reducing data preparation time by [X]%.
- Conducted exploratory data analysis and model optimization, improving model performance/accuracy by [X]%.
- Trained, validated, and tuned predictive models using Scikit-learn, achieving [X]% accuracy on [use case/dataset].
- Automated recurring data processing workflows, reducing manual effort by [X] hours per week.
- Partnered with cross-functional stakeholders to translate business requirements into ML solutions across [X] projects.
- Authored technical documentation, model evaluation reports, and performance summaries for stakeholder review.
- Researched and benchmarked multiple machine learning algorithms to identify the best-performing model for each business use case.
- Wrote optimized SQL queries to extract, transform, and analyze data from MySQL and SQLite databases for ML pipelines.

## Projects

### Customer Churn Prediction System

- Built a classification model to predict customer churn risk using behavioral and transactional data, achieving [X]% accuracy.
- Engineered features from raw customer data to improve model predictive power.
- Technologies:* Python, Pandas, Scikit-learn, SQL

### Sales Forecasting Engine

- Developed a time-series forecasting model to predict product demand, improving forecast accuracy by [X]% over baseline.
- Analyzed historical sales data to identify trend and seasonality patterns informing the model design.
- Technologies:* Python, NumPy, Pandas

### Data Quality Analyzer Tool

- Automated data validation, cleaning, and quality-check processes for large-scale client datasets, reducing manual QA time by [X]%.
- Implemented reusable data quality rules applied across [X] datasets/pipelines.
- Technologies:* Python, Pandas, SQLite

## Education

### Master of Computer Applications (MCA)

2022

Sri Manakula Vinayagar Engineering College, Puducherry — CGPA: 7.78

### Bachelor of Computer Applications (BCA)

2020

Saradha Gangadharan College, Puducherry — CGPA: 5.56

## Certifications

Java Full Stack Developer — Green Technology, Chennai

Oct 2023 – Feb 2024

Web Development & Java — Nexus Info Training

Mar 2024 – Jun 2024
